GSK Paid Internship Summer Program For Undergraduates

Description

GlaxoSmithKline (GSK) is a leading global pharmaceutical company dedicated to improving the quality of human life by enabling people to do more, feel better, and live longer. We are seeking a motivated and skilled Pharmaceutical Research Scientist to join our dynamic research and development team. In this role, you will play a critical part in advancing GSK's mission to develop innovative pharmaceuticals that address unmet medical needs.

Responsibilities

1. **Drug Discovery:** Conduct research to identify and develop novel pharmaceutical compounds that have the potential to treat various medical conditions.
2. **Experimental Design:** Design and execute experiments to validate the efficacy and safety of drug candidates.
3. **Data Analysis:** Analyze and interpret experimental data, using statistical and computational tools to draw meaningful conclusions.
4. **Collaboration:** Collaborate with cross-functional teams including chemists, biologists, and clinical researchers to optimize drug development processes.
5. **Regulatory Compliance:** Ensure all research activities adhere to regulatory guidelines and ethical standards.
6. **Documentation:** Maintain detailed records of experiments, results, and methodologies in accordance with GSK's documentation procedures.
7. **Continuous Learning:** Stay current with the latest advancements in pharmaceutical research and apply this knowledge to projects.

Qualifications

- Ph.D. in Pharmaceutical Sciences, Chemistry, Biology, or a related field.
- Strong understanding of drug discovery and development processes.
- Demonstrated experience in designing and conducting experiments, preferably in a pharmaceutical research setting.
- Proficiency in data analysis software and laboratory equipment.
- Excellent communication and collaboration skills.
- Strong problem-solving abilities and attention to detail.
- Ability to work effectively in a team-oriented environment.

Experience

Minimum of [X] years of post-doctoral or industry experience in pharmaceutical research.

Skills

- Proficiency in laboratory techniques and equipment operation.
- Strong analytical and data interpretation skills.
- Excellent written and oral communication skills.
