## Pfizer Internship Summer 2025 Biomarker Statistician Associate Director

### Description

Are you interested in contributing to the development of life-saving drugs and therapies? If so, the Pfizer Internship Summer 2023 for a Biomarker Statistician Associate Director in New York might be the perfect opportunity for you. This internship offers a unique chance to work with a talented team of professionals while gaining invaluable experience in the pharmaceutical industry.

### Responsibilities

As a Biomarker Statistician Associate Director at Pfizer, you will be responsible for providing statistical leadership and expertise to clinical development programs. You will also be responsible for designing, implementing, and analyzing clinical biomarker data and working closely with cross-functional teams to deliver high-quality data to support drug development programs. Additionally, you will collaborate with colleagues to publish scientific articles and present data at scientific meetings.

### Qualifications

To be considered for this opportunity, you must have a PhD in biostatistics, statistics, or a related field, and have strong experience in the pharmaceutical or biotech industry. You should also possess expertise in clinical trial design and analysis, as well as experience working with biomarker data. Strong leadership and communication skills are also essential, along with the ability to work in a team environment.

### Experience

The ideal candidate will have at least 5 years of experience in the pharmaceutical industry, with a focus on clinical development and biomarker analysis. Experience working with clinical trial data and biomarker data is highly preferred. You should also have experience collaborating with cross-functional teams and leading statistical analyses to support drug development programs.

### Skills

In addition to the qualifications and experience mentioned above, the successful candidate should possess strong problem-solving, critical thinking, and analytical skills. You should be able to think strategically and be comfortable working in a fast-paced environment. Excellent written and verbal communication skills are also a must-have, along with strong attention to detail and the ability to work independently.

### Job Benefits

The Pfizer Internship Summer 2023 for a Biomarker Statistician Associate Director in New York offers a comprehensive benefits package, including competitive pay, health and wellness benefits, and opportunities for professional development. You will also have access to Pfizer's vast resources and network, as well as the opportunity to work with and learn from some of the best professionals in the pharmaceutical industry.
